Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 August 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

Claims 1 and 5 are objected to because of the following informalities:

The terms "a paper money" (claim 1, lines 1 and 2), "one of the light beam" (claim 1, lines 8 and 9) and "surfaces is" (claim 5, line 3) are improper grammar.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6-18 are rejected under 35 U.S.C. 102(b) as being anticipated Patent Number 5,955,741 by Kayani ("Kayani"). The currency apparatus disclosed by Kayani incorporates a detector for measuring the limpness of paper money (column 3,

Art Unit: 3653

line 14-16), comprising light beam emitter 12 transmitting light to both printed and non-printed areas of a bill, receiver 20 for receiving a light beam reflected by the paper money, and receiver 22 for receiving a light beam passing through the paper money.

Kayani fails to disclose a paper money path. Said path is inherent to currency apparatus because a banknote must pass through said path to be scanned by the detector.

Kavani fails to disclose the detection of a particular maximum or minimum luminous intensity. The detection of specific thresholds of luminous intensity, including that reflected from and passing through a piece of currency and the contrast between said intensities, is inherent to the apparatus of Kavani because any determination of the acceptability of a bill limpness requires that predefined quantities of luminous intensity defining acceptable and non-acceptable ranges be established.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kayani as applied to claim 1 above, and further in view of Patent Number 5,761,089 by McInerny ("McInerny"). Kayani fails to disclose a money deforming device. McInerny

Art Unit: 3653

teaches a money deforming device, comprising roller 63a having a tapered surface and supplemental roller 42a, for applying a tension to paper money in a first direction parallel to a predetermined transfer direction and perpendicular to a paper money thickness direction.

Allowable Subject Matter

Claims 5 and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark J. Beauchaine whose telephone number is (571)272-6934. The examiner can normally be reached on 8:00AM through 5:00PM Mondays through Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick H. Mackey can be reached on (571)272-6916. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
